Ace and Versa Dock Floats

Seaco Marine uses ACE Floats as the foundation for it's dock systems.

ACE Floats are a rotationally molded foam filled, one-piece seamless plastic shell design to create an exterior that prevents leakage, structural failure and joint separation. The float wall is made of tough virgin polyethylene with ultra violet inhibitors to prevent damage from the sun, debris, oil, gas, marine organisms, salt water & fresh water. A minimum wall thickness of .125 offers a stronger more durable float. The top of the shell is flat with molded-in mounting slots for easy attachment to any dock frame.

| FFMB448-12 | 32 | 24 x 48 x 12 | 409 |
| FFMB448-16 | 38 | 24 x 48 x 16 | 546 |

The Industry's First To Offer A 15 Year Warranty

Our Ace and Versa Dock Floats continue to provide features and benefits that to set them apart from other floating dock products. You can be assured that our dock floats meet exacting specifications and quality standards with a warranty that is unmatched in the industry.

The ACE Float Warranty provides 100% non-prorated for the first 10 years and are warranted against cracking, peeling, sloughing and deterioration from ultra-violet rays, while retaining resiliency against bumps by watercraft under normal usage for a period of 15 Years from the proven date of purchase. Any float drum thought to be defective must be returned to the manufacturer (prepaid) and judged defective by the manufacturer.

This warranty does not cover any float drum that has been subject to negligence, misuse, alterations, accidents, ice movement, storm abuse or improper installation and support.

Failure to follow the "Procedures for Using Float Drums" also voids this warranty. This warranty applies only for the sole purpose of floatation of docks. Other uses will not be honored.

Ace Float Drums IMANNA Tested and Certified

IMANNA Laboratory, Inc. is a privately-owned, independent testing facility providing certification testing for marine products. IMANNA is recognized as an approved laboratory for testing to marine industry standards. Den Hartog Industries, creator of Ace Roto-Mold Float Drums, recently asked IMANNA to put their well-respected products to the test. IMANNA (est. 1983) is recognized as an approved laboratory for testing to the industry standards published by the American Boat and Yacht Council and as a Standards Compliance Specialist by the National Marine Manufacturers Association (NMAA).

IMANNA Laboratory tested and certified Ace Float Drums:

- ASTM D1998-06 Falling Dart Impact tested and certified!
- 7-Day Hunt Water Absorption tested and certified!
- Encasement Wall Thickness tested and certified!
- Calibrated Tank Buoyancy tested and certified!

Are the float drums you buy certified by an accredited testing agency?

...filled float drums offer durable flotation for a variety of dock systems. The plastic, one-piece exterior shell prevents leakage and separation caused by weak joints. The drum is made of tough virgin polyethylene with ultra violet inhibitors to prevent damage from the sun, debris, oil, gas, marine organisms, salt and fresh water. A nominal wall thickness of .125
