L4 Aluminum Docking System

The L4's innovative patented design uses high strength TIG welded aluminum assemblies bolted into the Seaco proprietary frame for easy installation and carefree maintenance. Designed to work with changing water levels the L4 can be configured in either a standing leg or floating configuration to suit your waters depth. The patented Seaco fastening system allows easy placement of swim ladders, cleats, chairs, railings and umbrellas just about anywhere on the dock **giving you complete control over the customization of your dock system** at your lakeside cottage or residence.

Easy to assemble, no-maintenance aluminum
