Classic Wood Dock Hardware

Seaco has been supplying wood dock hardware for many years and now introduces our classic series to accommodate 2x8 and 2x6 timber frame docks. Wood construction procedures matched with structural galvanized hardware creates a system that will enhance your waterfront for many years.

Common dock sizes can be coupled into a number of configuration options with galvanized hardware for superior corrosion resistance and strength for reliable long-term connections in the harsh environmental demands of Canada's Arctic to the splendour of North America's cottage areas.

ALL HARDWARE 3.5" ON CENTRE HOLE SPACING
