L6 Aluminum Docking System

Seaco's purpose built Commercial Aluminum Dock System, The L6, has been designed to surpass the performance of a traditional welded dock frame while providing a robust near maintenance free system. The L6 is a clean sheet modular system that encompasses a series of features that provide the customer with the ability to rapidly change, expand, or scale their marina's layout.

Its propriety extrusion and patented fastening system makes this system lightweight with sections comprised of marine grade aluminum, giving it a super strong internal structure. The proprietary fastening method enables the easy addition of accessories, hinges, and gangways, all with minimal tools. Our corner design and assembly method ensures consistent alignment, frame squareness and is designed to work with panelized wood or composite decking with standard dock frame sizes available in 4, 6, 8, 10 and 12 foot widths.

Industry Leading 15 Year Warranty on 77 Different Sizes of Floats
