Timber Frame Wood Docking Systems

The Seaco Wood Dock has been the foundation that has enabled Seaco to grow and proudly offer an ever expanding number of products and services to suit the demands of cottage, residential and commercial dock applications.

Our Timber Frame docks are made from the durability and natural decay resistance of Douglas Fir from companies certified in Sustainable Forest Management practices and are engineered to meet the demanding requirements of floating dock environments.

Common dock sizes can be coupled into a number of configuration options with galvanized hardware for superior corrosion resistance and strength for reliable long-term connections in the harsh environmental demands of Canada's Arctic to the splendour of North America's cottage areas.

IMANNA is recognized as an approved laboratory for testing to Marine Industry Standards.

Ace Floats Tested and Certified!

- ASTM D1998-06 Falling Dart Impact
- 7-Day Hunt Water Absorption
- Encasement Wall Thickness
- Calibrated Tank Buoyancy

The ONLY FLOATS YOU CAN BUY certified by an accredited testing agency!
